Please, register and tell us about any problems that you face.The Statistical and Data Management Core (SDMC) supports activities in basic, translational, and clinical research by providing statistical and data management support for NCCU investigators. In addition, the Core serves as a liaison between NCI and the Epidemiology and Cancer Control Research Area (ECCAP) and other areas of NCI. The SDMC has been organized to meet the needs of the research projects and activities of the NCCU-based and other investigators who are funded by the NCI. The goal of the SDMC is to support the research projects of the NCCU-based investigators in the areas of bioinformatics, data and assay management, computer science, biostatistics, and data management. The support provided to NCCU-based investigators through this Core is of high quality and is cost-effective. These activities directly benefit the NCCU investigators through increased productivity and acquisition of federally-funded research awards, as well as through the development of new projects. Statistical, data, and assay management support is also

provided to NCCU-based investigators in the areas of personal health information and genetic data management. This support provides further benefit to the NCCU-based investigators through the availability of the research biobank. The provision of high quality support is facilitated by the close collaboration with investigators, the deliberate efforts of the statisticians at the NCCU, and the integration of the SDMC with the CIPM. The research projects supported by the SDMC benefit from the following personnel: Biostatistics & Data Management: W. Lane, PhD, W. Smith, PhD Computer Science & Bioinformatics: S. Pande, PhD & D. Craddock, BS Bioinformatics: M. Tice, PhD, B. Brown, MS & G. Hughes, PhD Software Engineering & Computer Support: L. Hunchader, MSN, LISN, RCP & D.
